

Yara Marín

BACKEND DEVELOPER · CYBERSECURITY ENTHUSIAST

Spain

✉ profesional@miguvt.com | 🏠 miguvt.com | 📺 MiguVT | 📖 blog.miguvt.com

“Backend-focused. Privacy-driven. Always innovating.”

Summary

Backend Developer and Systems/Networks student dedicated to building reliable, scalable, and privacy-first systems. Experienced in managing self-hosted infrastructures (Linux, Docker, Nginx) and actively contributing to open-source communities. I combine logical problem-solving and automation with strong communication skills, bridging the gap between technical architecture and creative digital content.

Experience

Subastasac

WEB DEVELOPER (FREELANCE)

Remote

Present

- Leading the complete remake and modernization of the Subastasac web portal, optimizing it for concurrent online asset auctions.
- Improving security and user flow to ensure reliable, high-performance bidding mechanics.

SDI

IT INTERN (PRÁCTICAS DE EMPRESA)

Spain

2025

- Provided technical support, diagnosed system issues, and contributed to web development tasks during a two-month internship.

Open Source Contributions

Chatterino2 (2,400+ GitHub Stars)

CORE CONTRIBUTOR

GitHub

2023 - Present

- Developed and integrated extension ID support for custom plugins in this high-performance Twitch chat client written in C++.

AxMinions (30,000+ Downloads) & ServerMappings

OPEN SOURCE DEVELOPER

GitHub

2023 - 2024

- Fixed critical dependency issues and resolved numerous technical bugs for AxMinions, ensuring stability for thousands of active users.
- Added heavily optimized Minecraft server details into LunarClient's ServerMappings registry.

LVRA (Linux VR Adventures) Wiki

LINUX/VR ECOSYSTEM CONTRIBUTOR

GitHub / Discord

2024

- Authored a critical scripting fix for the Valve Index "blank EDID" bug on Linux, which was widely adopted and became a community standard on the official wiki (wiki.vronlinux.org).

FreesmLauncher (380+ GitHub Stars)

ACTIVE CONTRIBUTOR

GitHub / Discord

2024 - Present

- Contributed to the core codebase and provided technical troubleshooting for users within the community Discord server.

Selected Projects

Migurinth

LEAD DEVELOPER

Active

- Engineered a privacy-first Modrinth fork that strips out all telemetry and advertisements, prioritizing user data protection.
- Implemented full offline integration tailored for broader server accessibility.

ChatterinoWatch

CREATOR & DEVELOPER

Active

- Built a lightweight browser extension (Chrome & Firefox) linking web streaming with native Chatterino instances automatically.
- Currently maintaining an active user base of approximately 160 daily users relying on the extension for continuous data synchronization.

NP2_Kernel

KERNEL DEVELOPER

2023 - 2024

- Compiled and maintained a custom Android kernel for the Nothing Phone 2 based on LineageOS source trees.
- Incorporated custom performance patches, advanced driver integration, and enhanced security primitives.

Infrastructure & Systems

Homelab & Cloud Integration

SELF-HOSTED SECURE INFRASTRUCTURE ARCHITECTURE

Ongoing

- Designed and actively maintain a complete digital infrastructure bridging a local Raspberry Pi 5 with an OVH VPS via Wireguard VPN tunnels.
- Deployed and managed an array of self-hosted services including a Matrix server for decentralized communication, Nextcloud, Vaultwarden, and custom Discord bots (YAGPDB + VOCARD).
- Engineered a fully-featured game and application hosting environment utilizing Pterodactyl Panel alongside Wings and custom extensions for optimal resource scheduling.
- Securely route traffic using Nginx stream modules (Reverse Proxy), enforcing strict zero-trust principles and robust network isolation.

Skills

Languages	Spanish (Native) · English (Fluent Written, Advanced Spoken)
Backend	Python, Node.js, Go, SQL (PostgreSQL), JavaScript, TypeScript, Lua, PHP, C#, Java
Frontend	HTML5, CSS3, React, Vue.js, Vite, Tailwind CSS, Webpack
Infrastructure	Linux (Debian/DietPi, Arch, Kali), Docker, Nginx, Wireguard VPN, Bash/Shell Scripting, Hardware Diagnostics
Tools & Workflows	Git, VSCodium, Unity, Blender, OBS, DaVinci Resolve, GIMP

Education

FDP Rioja

Spain

DEGREE IN MICROCOMPUTER SYSTEMS & NETWORKS (SMR)

2024 - 2026

- Focusing on systems administration, network architectures, and hardware configurations.

IES

Spain

EDUCACIÓN SECUNDARIA OBLIGATORIA (ESO)

Graduated

Content Creation & Communication

MiguVT

Twitch / YouTube

DIGITAL CONTENT CREATOR / VTUBER

Ongoing

- Build and grow a technical and gaming-oriented community featuring 1,400+ Twitch followers and 730+ YouTube subscribers.
- Leverage strong real-time communication skills, project ideation, and community management alongside creative software proficiencies (OBS, video editing, 3D avatar rendering pipelines).
